

To whom it may concern....I'm currently paying to receive XM Satellite Radio and all of it's quality and variety which is not available anywhere else.Especially the weather & traffic information.I do not believe it's the National Assosiation of Broadcasters right to dictate what I the paying consumer should hear.I would respectfully urge the FCC to reject the NAB's petition 04-160 and to please support XM's ability to provide we the paying cosumer the kind of programming we demand and deserve.Thank You
